

ROAD WARRIORS – LEAN STYLE

The group set out to reduce their set-up/de-mob time by 50%. And they exceeded their target:

What previously took 3 guys 8 hrs., now takes three guys only 3 hours! In dollars that's \$1,920 reduced to \$720. That's a \$1,200 savings per job!

*Averaging 85 job set-up/de-mobs per year, that's **\$102,000 saved per year – in one dept., one small crew!***

The road to success is always under construction.

JAMAR'S LEAN PURPOSE:

Increase Customer Value Through:

- Empowering Our People
- Eliminating Waste
- Enhancing Productivity

The Jamar Company is an Equal Opportunity Employer/Contractor

Have you planned hunting trip this year? What happens when you get there and realize you forgot your gun?! Or you're putting your boat in the water for your long awaited fishing getaway and realize you've left your favorite rod and reel at home? Or worse yet...the plug for your boat?! Pre-planning can make or break your trip.

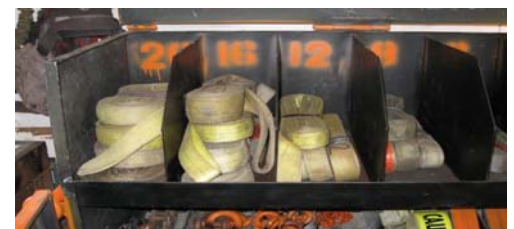

Working on the road requires a similar mind set. Shut downs are critical to get in and get out as efficiently as possible. Lack of specialized equipment and tools will wreak havoc on a job's productivity. This can be costly to our Customer, and our company. By using simple organization and inventory methods our 'road warriors' know what they have...and what they need.

1 of 4 two man gang boxes

Pictured left is one of the four gang boxes. These boxes are loaded with color coded tools. Each box is kept stocked according to the inventory list posted inside and outside the box.

At right, is a rigging box complete with slings, shackles, beam clamps, etc. Everything is neatly put away ,labeled and inventoried to ensure that all necessary equipment for the job is readily available .

Two welding carts fully stocked with gas, wire, hose, lead, stinger, ground, gauges, gloves, grinder etc. (left).

A couple of Road Warriors, pictured below

travel approx. 50,000 miles per year. After a 5S of their trailers and trucks, they have cut set up time and de-mob time in half. It is important to note that PM/DM support of these improvements and sustainment is critical to our continued success!
